Elements EDR co-security services by WithSecure™

Enhance your security operations team with flexible access to combat-fit defenders
Two decades of cyber security incident response tells us that the cost of a cyber security incident is 70-90% lower if it can be contained within 72 hours of detection.
We live in a digital age. To succeed in business means being exposed every day to the risk of cyber-attack.

The stakes are high: an incident dealt with correctly can be resolved in hours rather than months. The average cost of a cyber-attack is €180,000: 60% of small businesses cease operations within six months of an attack\(^1\)\(^2\).

Winners and losers are determined by how they manage cyber risk. Boards and leadership teams that successfully steer their business through a crisis can avoid losing revenue through lost customer trust, legal action and regulatory fines. They can even find their careers enhanced.

---

Criminals have industrialized, and cyber-attacks are more frequent, widespread, and damaging than ever before. Cloud technology and remote working is complicating IT, making it harder to defend. An estimated 2,200 cyber security attacks are detected each day. A 24/7 detection and response capability is an essential defense.

What if you could respond with assurance to the detections that present the most risk?

Obstacles to cyber security

Criminals have industrialized, and cyber-attacks are more frequent, widespread, and damaging than ever before. Cloud technology and remote working is complicating IT, making it harder to defend. An estimated 2,200 cyber security attacks are detected each day. A 24/7 detection and response capability is an essential defense.

What if you could respond with assurance to the detections that present the most risk?

Good security requires partnership. No one can solve every cyber security problem alone.

We take a ‘co-security’ approach, bolstering your security operation with experienced, threat informed, monitoring and investigation support. We offer two services:

**WithSecure™ Elevate**

Elevate co-secures Elements EDR customers; they can have our Detection and Response Team (DRT) investigate detections, and provide remediation guidance.

**WithSecure™ Co-Monitoring**

Co-security achieved by Elements EDR customers working in WithSecure’s DRT to:

- Monitor of all severe-risk detections, out of office hours or 24/7,
- Validate severe-risk detections and investigating them using human threat analysts,
- Escalate confirmed attacks directly to customers or partners on-call,
- Provide containment advice for fast and effective remediation.

WithSecure™ also provides seamless escalation to its government-assured Incident Response (IR) services for EDR customers. Those that have an IR Retainer receive guaranteed support when they need it.
Outcomes we deliver

Our co-security approach and experience enables your security operations teams to:

**Increase resilience**
Expert investigation and remediation guidance for all your severe-risk detections

**Minimize disruption**
24/7 security operations support and seamless access to government-assured IR services

**Maintain customer trust**
Enhanced detection & response controls that enable you to comply with regulations
WithSecure™ products are deployed across 5.5 million endpoints in tens of thousands of businesses. We understand in depth the whole threat data collection chain. We employ over 50 threat researchers to identify new and evolving tools, tactics and procedures used by attackers.

Our DRT is made up of experienced, research-led incident investigators and responders enabled by technology. Our processes and technology are optimized to deliver consistent, stable detection and response services at scale.

When it comes to making critical decisions, you can trust our data – and what our experts are telling you about it.
Our record

WithSecure™ has delivered managed detection and response (MDR) services since 2015. We co-secure companies, and governments worldwide. We conduct 1,200 investigations each year. Every day, our DRT battles with organized, well-resourced criminal and state-sponsored groups.

We have been a government-assured incident response service provider since 2013. Our capability is assured by government agencies in Germany⁴ and the UK⁵.

We partner with our customers – in some cases for over a decade, equipping them with the means to thrive in an increasingly complex and hostile cyber security world.

Our Elements portfolio

Services
- Incident Response Readiness
- Elevate tough cases to our experts
- Incident Response Retainer
- Co-Monitoring of severe-risk detections
- Emergency Incident Response Support
- Solutions Support

Pricing models
- Annual license
- Monthly subscription

Solutions
- Endpoint Protection
  - Protects from the most sophisticated ransomware, malware and zero-day threats.
- Vulnerability Management
  - Identifies an organization's assets pinpointing the vulnerabilities and the most critical loopholes.
- Collaboration Protection
  - Fortifies the Microsoft 365 cloud collaboration platform's built-in security measures with a powerful security layer.
- Endpoint Detection and Response
  - Gives instinctive detection capabilities and versatile response actions. Can be expanded with Elevate, the 24/7 expert help.
- Cloud Security Posture Management
  - Identifies cloud misconfigurations that could be exploited in a cyber attack.
WithSecure™, formerly F-Secure Business, is cyber security's reliable partner. IT service providers, MSSPs and businesses - along with the largest financial institutions, manufacturers, and thousands of the world's most advanced communications and technology providers - trust us for outcome-based cyber security that protects and enables their operations. Our AI-driven protection secures endpoints and cloud collaboration, and our intelligent detection and response are powered by experts who identify business risks by proactively hunting for threats and confronting live attacks. Our consultants partner with enterprises and tech challengers to build resilience through evidence-based security advice. With more than 30 years of experience in building technology that meets business objectives, we've built our portfolio to grow with our partners through flexible commercial models.

WithSecure™ Corporation was founded in 1988, and is listed on NASDAQ OMX Helsinki Ltd
