

# WithSecure™ Elements Extended Detection and Response

AI-powered extended breach prevention,  
investigation, and response

## Modern workspace protection – endpoint, identity, email, and collaboration

WithSecure™ Elements Extended Detection and Response (XDR) is a unified solution to protect modern IT estates, enabling organizations to understand and respond to advanced threats across endpoints, identities, emails, and collaboration tools (Teams, OneDrive, and SharePoint). It enables you to focus on minimizing the business impact of cyber threats through threat investigation and fast response actions while our automated

preventative controls have already helped in blocking ransomware and fileless attacks.

Our AI-powered tooling enables higher-fidelity detections and provides helpful assistance during investigation, to help you quickly understand threats in a broad context. Organizations can also easily get access to WithSecure™ expertise to get help with complex detections or widespread major incidents.

# Extend your security. Gain insight not complexity.

**One turn-key solution for protecting your modern IT estate** against sophisticated attacks across users, endpoints, email, and collaboration tools.

**Extensive automated security:** Block ransomware, malicious files, and URLs to prevent incidents before they happen, in addition to detecting and responding to attacks.

**Broad Context Detection™** helps you understand threats and suspicious behavior with built-in guidance, further enhanced by WithSecure's Luminen GenAI assistant.

**Detect the latest attacks against identity:** Ensure your detection and response capability is extended to protect your remote workforce.

**Loaded with value:** You get XDR including Identity Security from a single pane of glass, without having to invest in the most extensive and expensive software bundles on the market.

**Co-Security Services:** Additional on-demand support with Elevate to WithSecure™ for demanding analysis and investigations that require expert help. Flexible and scalable optional service offerings include Co-Monitoring and WithSecure™ Managed Detection and Response (MDR).
